

BE IN THE KNOW

CONSERVATION LEVIES

SUN DESTINATIONS™

Similar to neighbouring reserves, we've had to significantly enhance our anti-poaching strategies, incurring substantial expenses. Our goal is to safeguard not only rhinos but also other susceptible species.

As such, all reservations will include applicable charges for reserve conservation and/or bed levies, aimed at supporting the reserve's conservation initiatives. During a stay, guests will contribute a conservation levy per person, per night, or per stay (depending on the specific camp). This contribution plays a vital role in maintaining the reserve's pristine condition and plays a significant part in reducing the carbon footprint of our camps. We adhere to a strict environmental protocol to ensure minimal impact on the surroundings.

The funds from the levy also aid in road maintenance, eradication of invasive plants, managing fire breaks, and other factors that contribute to the overall well-being of the reserve. Furthermore, the conservation levy serves to subsidize anti-poaching endeavours. This ensures the continuous enhancement of counter-poaching technology, the advancement of smart fencing, the employment of additional teams, the financing of counter-poaching flights, and the acquisition of new equipment to uphold ongoing protection.
